Creative Cloud - Adobe's affordable, yet powerful software collection keeps pace with your professional needs. Creative Cloud is organized into six carefully curated creative bundles-- from the three-dimensional (3D) Pro package to a mix of image-editing and web design products. It provides all the essential tools to help you create, compose, learn, share and showcase your creativity and inspirations. It's also your base for all of your creative work in the future.

Content-Aware Move - The Content-Aware Move tool makes it easy to move and merge images in Adobe Photoshop. You can use it to easily move an object or group of objects to another layer and import a friend's photo into your image. This tool, available in Creative Cloud, is especially helpful for moving large objects, such as large items or multiple people without having to resize them first. The Content-Aware Move tool also has several preset ranges that can be used. No matter what you're working on, the Content-Aware Move tool is the fastest way to move things around. It's built right into CorelDRAW on Windows and the Pixen iOS app.

Object Selection - Object Selection helps you easily select and delete objects, such as objects, layers and text spots in your image. You can drag to select object(s) anywhere in the image and delete the entire photo when you've selected all the objects you need to remove. Object Selection can be used with any image when it's in the active layer of your image.

2019 will also bring improvements to the Bulb feature that enables users to change the exposure of a photo within an image without performing a complete file re-save. Another popular feature, Red

Eye Removal, has been improved and is now faster. Users can now easily import multiple images from their Macs or iPhones and automatically optimize the metadata and optimize the white balance -- also without the need to use the new Lightroom or the mobile application. Along with iOS support for the new Adobe XD web app, the Adobe XD mobile app now has the ability to easily save mobile copy/paste styles in the form of a single share-able clip. Users can drag and drop clips on the page, enlarge or drop them on the sidebar, merge unmerge and transform according to the context. The new Online Video Editor gives users access to a full program to create amazing videos. It includes the new video currencies and the Drag and Drop feature that enables users to make quick edits in the project without using the keyboard or menu system. Users also have the ability to use the new Move tools -- Auto-Pad, Auto-Straighten and Auto-Reposition -- which allows the user to create perfect borders around the area within a frame or remove the area altogether. The software also lets users create hip-hop videos, 3D videos, and videos with 360 degree edit. Adob identified four pillars of modern creativity: AI, AR, ML and 3D, which combined with the strides made with imaging and type, and it has announced that it is modernizing Adobe. To do this, the company will integrate all of its consumer-facing software under a common set of minimal APIs to create a single, unified experience across any of its apps. A brand-new Creative Cloud website will highlight that application regardless of platform and device developers will be able to integrate features from all of the company's programs into one app -- Adobe's vision is to make the user's experience more intelligent and discoverable.
